SUMMARY

I am a Full Stack Software Developer with a proven track record of designing, implementing, and deploying complex software solutions. With a comprehensive skill set that span both front-end and back-end technologies, I excel in delivering high-quality, scalable applications that meet and exceed client expectations.

SKILLS AND COMPETENCIES

- Excellent communication skills,
- Programming languages: PHP, Nodejs, JavaScript, Python, HTML, CSS.
- Web Development frameworks: Laravel, Express js, React js, Django
- API Development (RESTful)
- Databases: MYSQL, SQL Server, PostgreSQL
- Excellent organizational and time management skills,
- Problem-solving skills, teamwork skills, Self-development skills,
- Agile\Scrum Framework
- Tools: Docker, Git

WORK EXPERIENCE

(October 2024 –current)

Software Developer at Eclectics International

Achievements:

- Delivered a bulk user registration module for agency banking, reducing operational onboarding time and improving system efficiency and cost-effectiveness.
- Developed and optimized the USSD platform, implementing client-requested features that enhanced transaction flows and overall user experience for banking services.
- Successfully deployed completed projects to the UAT server using docker containers and supervised user acceptance testing (UAT), ensuring functionality met business requirements and facilitating timely feedback loops for final adjustments.
- Cross-functional Collaboration: Actively participated in team meetings, contributing to technical discussions and aligning development efforts with business objectives.

(December 2019 –September 2024)

Software Developer at Tally Global Software

Achievements:

- Designed, developed, and maintained custom CRM solutions tailored to clients' specific needs.
- Developed payroll systems to automate and streamline payroll processes, enhancing efficiency.
- Developed secure and efficient APIs endpoints for the helpdesk application to facilitate communication between the application and various clients.
- Conducted thorough debugging and troubleshooting of existing systems, ensuring optimal performance and functionality.
- Collaborated with cross-functional teams to gather requirements, plan projects, and deliver solutions within deadlines.
- Debugged and Conducted testing on the existing systems.

(June 2018 – November 2019)

Software Developer at Afya Pro Connected Care

Achievements:

- Worked closely with system analysts to translate user stories and requirements into detailed afya pro product specifications.
- Streamlined Scrum Software Methodology into the development process to standardize and accelerate software development and operations.
- Played part in the software development life cycle process that enabled good planning and process of how and what should be done to make the software be developed successfully.
- Participated in code review meetings, providing input on bugs, inefficiencies, and potential solutions to emergent issues.

PROJECTS

E-commerce System

The E-commerce System is a comprehensive platform designed to facilitate online business sales. A user-friendly interface and efficient functionalities enable sellers to showcase their products and allow customers to purchase items seamlessly.

Technologies used are

- Laravel framework
- JavaScript
- Vue.js
- MySQL Database
- Visual studio code editor
- Git

Link: https://github.com/amasdeogratis/fixpay_dev

Teachers Consultation System

- Developed a full-stack web app to allow university students to book appointments for their lectures using Python and Django Framework.
- Utilized Django signals to trigger notifications when an appointment is accepted or rejected. For example, when a lecturer approves a student's appointment request, an automated email or push notification is sent to notify the student of the acceptance.

Technologies used are

- Python
- Django framework
- JQuery
- MySQL Database
- Git
